I'm listening to you. •

This game is kind of cool.

I like that you can fly on here..

I came 2nd in my very 1st match.. It did crashed once but after that it was ok.

No sweaty players on here yet. (well I don't think so) I'll check again next time... Very fun, and fluid gameplay, inventive levels, a ton of charm and a lot of content. Great!. Excellent game. As i remember it.. It's PLANE to see that this game is perfect 4/10. Developers ***** this game where it hurts, daybreak have ***** up the battle royal, now this, the devs have no brain, they are selfish tossers who milk the games for ££££. Let this game die, do NOT BUY it, save yourself some money as there is plenty of alternatives rather than this pile of♥♥♥♥♥♥♥♥. they never released anything and the current version is basically unplayable. nuff said.. it looks like that door was damaged by an explosion. you should be able to break through using the butt of your weapon press. B to perform a melee attack 3/10

i bought this game with the intention to drive around the city listening to new retro wave or similar, just to enjoy the vibes. first i wasn't happy having to solve a murder case, and i did not really care that much about the plot per se, but i spend every second being amazed by the beautiful vibes, lights, reflections and designs of the city so that there was no space for negative thoughts.

- the movement and car handling are very unpleasant, mmh it was fine
- i don't like driving with the hood of the car on the bottom of the screen
- some minor bugs that don't really affect the experience (also why is my shadow from a totally different model?)

+++ amazing design of the whole city / buildings / lighting / shades / weather / glass / graffiti (creator is a genius)
+ i liked that the missions were not pushy. you could solve objectives on your own without obtrusive hints or reminders
+ personal red mug to keep you company. This game is absolutely terrible.

1/4. Neil Gaiman and ghosts.

if u need anything more to convince you, you don't deserve to be convinced. What should i say about Insane 2 ?
Hm... not really good not really bad, i mean i'm not satisfied playing this game.

- Can't use my controller (But ok since many other racing games out there can't use controller anyway ==\)
- Racing car model not so interesting (can't ya make a beautiful design for the cars ?)
- Only a few participants in the race :! hm.... not so challenging anyway
- Checkpoint System. This one is really annoying, if u miss to register your car at any checkpoint in the race, then u will be counted as the last position racer, eventhough u're in the first line. So the things u have to do is.... either :
 1. u turn around ur car through a hard corner circuit or
 2. Restart the race from the first (Cause sometimes u are about to hit the last checkpoint, but cause of some mistake u miss to register so need to turn around, and by the time ya comeback in the right track, u already left behind so far :DDD)

- + Good graphic
- + Beautiful panorama design
- + Challenging Tracks. It's pretty difficult terrains

Overall... 65 / 100 = Not really good & not really bad also. Solid little game. I was pleasantly surprised since I picked it up for sale on a whim to play on a rainy day. That day was today and now I'm glad it was. 8-bit platform adventure in the Ghosts N' Goblins vein. If you're looking for some 80's nostalgia, this game will be just what you're looking for. One of the great things I think this offers is challenge. It has four continues and three lives each play through. You will have to work for your ending, something you don't see a lot of in modern games. Because there is a definitive pattern in how things appear/move, you will have to play enough to get a feel for the pattern to get through.

I only have two complaints. The first is the color palette as tones used were very neutral resulting a washed out screen with little to catch the eye. Because of this I think first impressions will leave people thinking this is an unexciting game to play. The second is pacing. It feels like all sprites are moving at approximately the same pace, resulting in the play feeling slower. I would suggest making some enemies a little faster or intermittently move quickly to keep players on their toes.

Ultimately, if you can get this game sub - \$10 range like I did, it's worth it. You'd have to really like this sort of game to be willing to pay over \$10. If you can get it for \$5, it's a steal.. Not quite sure what everyone is complaining about to do with this DLC. Yeah, I know it's old and it HAS had some issues, but DTG has fixed this. Even the sounds that it comes with default are'n't too bad compared to some. If you want the true experience though, get the AP Sound Pack. A nice add-on all in all.

. Awesome Game!! You can play as Zee Tee in 3D xD
SOOO MUCH FUNN!!

9/10 Waiting for the next Char.. ^-^. Installed launched, Antivirus says game wants install cookies/ plugins in web browsers 3 times .. exit , uninstal. steam WTF ? I like the idea behind the game, but it does a\u2665\u2665\u2665\u2665\u2665poor

job of explaining anything to the player. The UI is awful and clearly a tablet/phone port. You can mouse over or click on any stats to get extra information. There are countless features, none of which are bothered to explain.
